

# SMART PACKAGE ROOM - OPT-IN

## Opting-In to Receive Text Notifications from the Smart Package Room®

As a resident, you have access to use our secure Smart Package Room for package deliveries. After your package is delivered to the room, you will receive a notification with a PIN and QR Code link to access the room to pick up your package.

To receive text notifications, you must first Opt-In to the service:

1. A text message will be sent to you.

2. Tap the **link**.
3. Tap the **two checkboxes**, then tap **Submit** to agree and opt-in to receive delivery notifications.

You will start receiving delivery notifications via text.

- If you don't accept or reply with STOP to opt-out, your packages will be delivered to the Smart Package Room but you will not receive package notifications via text.
- To opt-in in the future, reply START to the notification or if you don't have the notification, contact Staff.

A screenshot of a web form titled "Text Notifications Opt-In" with the Smart Package Room logo at the top. The form contains the following elements: a greeting "Hello John S.", an explanatory paragraph about the service, two checkboxes with labels "Yes, I want to receive Text notifications" and "I acknowledge by using Smart Package Room I accept Terms of Service & Privacy Policy", a "NOTE" about separate opt-in for each recipient, a blue "Submit" button with a red border, and a footer with contact information and a disclaimer. The checkboxes and the Submit button are highlighted with red rectangular boxes.
